

Witham/Slea Blue Green Corridor

The Witham/Slea Blue Green corridor project is an exciting new partnership project funded by the European Regional Development Fund, South Kesteven District Council, North Kesteven District Council, Environment Agency, and National Trust, designed to restore and reconnect the river and river corridors through the urban reaches of both Grantham and Sleaford.

The project will focus on improving ecological connectivity by regenerating the rivers and river side habitats running through both towns, for the adaptability and resilience of the ecosystems, biodiversity, and the local and visiting populations. This is part of a series of consultations about the blue green corridor project. Subsequent consultations will focus on other green spaces along the river corridor routes.

Our vision for Grantham is to develop green spaces ranging from formal parks, sweeping meadows, wetlands and wooded regions all connected by a species rich, healthy, and vibrant blue river corridor with adjoining riverside walk.
